SUMMARY

Java Spring Boot Developer with 4+ years of experience developing **scalable microservices, REST APIs, and distributed systems**. Experienced in **Java, Spring Boot, Hibernate, SQL, NoSQL databases, OOP, design patterns, and software development best practices**. Skilled in translating **business requirements** into technical solutions and delivering features across the **SDLC**, from design and development to testing, deployment, and production support. Improved **backend performance by 15-30%** through SQL query optimization, efficient data access, and system design improvements. Hands-on experience using **AI-assisted development tools** to accelerate coding, generate and enhance **unit test cases**, identify code improvements, optimize implementations, and improve development productivity while maintaining code quality.

EXPERIENCE

Software Engineer

April 2022 – Present

Infosys Limited

Bangalore, KA

- Designed and developed scalable **Java, Spring Boot** applications, implementing modular **microservices, RESTful APIs, and distributed backend services** for enterprise applications.
- Collaborated with clients and cross-functional teams to analyze **business requirements**, contribute to **technical design**, estimate development effort, and deliver features throughout the **software development lifecycle (SDLC)**.
- Optimized **Hibernate ORM, SQL queries, and database access** across relational and NoSQL databases, reducing **API response times by 15%** and improving backend performance.
- Developed and maintained **unit and integration tests** using **JUnit and Mockito**, integrated **SonarQube** into CI/CD pipelines, and maintained **90% code coverage** with focus on code quality, reliability, and maintainability.
- Used **AI-assisted development tools** to accelerate implementation, generate and improve **unit test cases**, optimize code, identify potential defects, and improve development productivity while following established coding standards.

PROJECTS

Asset Management Platform | *Java, Spring Boot, Hibernate, Couchbase, Docker, Kafka*

Infosys Limited

- Developed and enhanced Spring Boot microservices for an enterprise asset management system, applying object-oriented design principles to build scalable and maintainable backend services.
- Optimized Couchbase queries and implemented appropriate indexing strategies, reducing API response time by 30% under high-load scenarios.
- Containerized applications using Docker and contributed to CI/CD pipelines with Azure DevOps, improving deployment consistency while maintaining 90% unit test code coverage.

Sanjeevani – Internal Donation Platform | *Java, Spring Boot, React.js, Tomcat, PostgreSQL*

Infosys Limited

- Developed RESTful APIs using Java and Spring Boot for an internal donation platform, implementing LDAP-based authentication and role-based access control (RBAC) to secure user access.
- Built and integrated React.js frontend components using Axios to consume backend APIs, resolving API integration and cross-origin communication issues for a seamless user experience.
- Designed and optimized PostgreSQL database schemas, migrated application traffic from HTTP to HTTPS by configuring SSL on Apache Tomcat and supported deployment to production environments.

TECHNICAL SKILLS

Languages: Java, Python, SQL, JavaScript

Frameworks: Spring Boot, React.js, Spring MVC, Spring Security, Hibernate, JUnit, Mockito

Web Technologies: JSP, RESTful API Design

Databases: MySQL, PostgreSQL, Couchbase (NoSQL), MongoDB

DevOps & Tools: Docker, Kubernetes, Azure DevOps, Apache Tomcat, Git, SonarQube, Postman

Concepts: Microservices Architecture, Distributed Systems, RBAC, OOP, Concurrency, Agile (Scrum), Kafka, Azure Cloud

EDUCATION

Velammal College of Engineering and Technology

Bachelor of Engineering in Computer Science

Madurai, TN

August 2016 – May 2020
